What I contribute

Clear requirements for developers and simpler workflows for customers: that is my contribution as a Product Owner. Nine years at iPaper, from support to product development, give me an understanding of user needs and the technology behind them. Working closely with developers and UX, I helped improve automation and interfaces and explained releases through videos, demos and release notes. My practical AI experience includes websites, an app and reusable workflows built with Claude, Codex and AI loops.

Selected achievements at iPaper

Shared automation

More data sources and customer needs could be supported by one shared solution for shoppable PDF catalogues. Expanded Enrichment Automation in close collaboration with a developer over around two years.

Simpler workflows

A slow product-image workflow became simpler with a new interface and asynchronous processing. Helped define and refine the solution; after two iterations, users were satisfied.

Product communication

Made new features understandable for customers and colleagues through internal product updates, release notes, customer how-to videos and weekly demos.

Customer needs met

Customers gained control over currency placement and trailing zeros. Specified both options, which shipped and received positive feedback through Customer Care.

What I want to work on

- **Product Ownership and Product Management** with users and developers.
- **People and collaboration:** Listen, build understanding and find shared solutions.
- **Useful technology:** Accessible products and practical applications of AI.

Experience at iPaper

iPaper B2B SaaS, Aarhus

Nov 2017 - 2026

Sep 2023 - 2026

Product Owner
Gave developers and UX designers concrete requirements and clear scope through customer interviews and ongoing discussion. Influenced priorities with the Product Manager. Specified checkout, product views, accessibility and Horizon's energy-rating system.

Jan 2022 - Sep 2023

Senior Implementation Specialist
Helped customers make automation, product data and analytics work within their marketing setup.

Jan 2020 - Jan 2022

Implementation Specialist
Connected product feeds, automation, Google Analytics and Tag Manager to customers' marketing setups so they could put iPaper to use.

Nov 2017 - Jan 2020

Support Specialist
Resolved technical problems and helped customers use the product in their daily work.

Further experience and responsibility

2025 - 2026

Health and safety representative, iPaper
Helped implement office initiatives based on employee input from surveys.

User behaviour

Identified practical UI improvements after release by reviewing Fullview recordings of customers using features.

VoiceOver

Worked with developers to test and refine HTML and ARIA labelling until Mac VoiceOver behaved as intended.

2017

Customer Success Manager, AccuRanker
Customer support and sales; support articles and automated customer communication with Intercom and HubSpot.

2016 - 2017

Web / SEO Manager, AudioNation
WordPress landing pages, technical SEO, HubSpot, Google Tag Manager and analytics reporting.

2014 - 2016

IT Supporter, GECKO Booking
Customer support, website booking integrations, testing and guides.

Earlier

NemID support at CGI; internet support at TDC; iOS development at Playnation; game audio and implementation at Logic Artists; audio production at M2Film and AudioNation.

Systems and tools

Product and collaboration

Jira, Asana and Confluence.

AI

Claude and Codex to build and test solutions. Reusable skills and AI loops for review and refinement.

Customers and marketing

Intercom, Fullview, HubSpot, WordPress, Google Analytics and Google Tag Manager.

Web and technology

HTML, CSS, JavaScript, automation and data feeds.

Audio and video

Logic Pro, Pro Tools, Reaper, Adobe Premiere Pro, Final Cut Pro and Photoshop.

Documentation

Product specifications, user stories, guides and support articles. All university assignments written in LaTeX.

Education and training

2010 - 2012

Master's degree (cand.it.) in Digital Design, Aarhus University
Specialisation in Audio Design.

2007 - 2010

BSc in Medialogy, Aalborg University
Interactive media, technology and user experience.

Training

Completed the statutory Danish occupational health and safety training. Web applications with Microsoft .NET and C# (Itucation, 2013).

Languages and interests

Languages

Danish and English: fluent, written and spoken.

Interests

Singing and guitar, including wedding performances with Flow & Green. Built my own smart home, experimented with Arduino and own a Raspberry Pi. Enjoy electronics, soldering, cycling and running.
