What I contribute

I turn customer needs into better features and simpler workflows. At iPaper, I helped expand automation, improve usability and explain new features through videos and demos. Nine years from support to Product Owner give me the customer perspective and the technical understanding. I also build websites, an app and reusable workflows with AI.

Selected achievements at iPaper

Shared automation

Expanded Enrichment Automation with a developer so one shared solution could support more data sources and customer needs and make PDF catalogues shoppable.

Simpler workflows

Helped replace a slow, cumbersome product-image workflow with a redesigned interface and asynchronous processing. After two iterations, users were happy with the result.

Product communication

Turned product changes into internal updates, release notes, customer how-to videos and weekly demos, explaining what was new and how to use it.

Customer needs met

Specified configurable currency placement and trailing-zero controls. Both shipped and received positive feedback from the customers who had raised the needs.

What I want to work on

- **Product Ownership and Product Management** with users and developers.
- **People and collaboration:** Listen, build understanding and find shared solutions.
- **Useful technology:** Accessible products and practical applications of AI.

Experience at iPaper

iPaper B2B SaaS, Aarhus

Nov 2017 - 2026

Sep 2023 - 2026

Product Owner
Used customer interviews and product knowledge to clarify scope with developers and UX designers and influence priorities with the Product Manager. Specified checkout, product views, accessibility and Horizon's energy-rating system.

Jan 2022 - Sep 2023

Senior Implementation Specialist
Helped new and existing customers put automation, product data and analytics to use in their marketing setup.

Jan 2020 - Jan 2022

Implementation Specialist
Implemented iPaper in customers' marketing setups, connecting product feeds, automation, Google Analytics and Tag Manager.

Nov 2017 - Jan 2020

Support Specialist
Resolved technical problems and helped customers use the product in their daily work.

Further experience and responsibility

2025 - 2026

Health and safety representative, iPaper
Helped implement office initiatives based on employee input from surveys.

User behaviour

Reviewed Fullview recordings of feature use and identified UI improvements after release.

VoiceOver

Worked with developers to test and refine HTML and ARIA labelling until Mac VoiceOver behaved as intended.

2017

Customer Success Manager, AccuRanker
Customer support and sales; support articles and automated customer communication with Intercom and HubSpot.

2016 - 2017

Web / SEO Manager, AudioNation
WordPress landing pages, technical SEO, HubSpot, Google Tag Manager and analytics reporting.

2014 - 2016

IT Supporter, GECKO Booking
Customer support, website booking integrations, testing and guides.

Earlier

NemID support at CGI; internet support at TDC; iOS development at Playnation; game audio and implementation at Logic Artists; audio production at M2Film and AudioNation.

Systems and tools

Product and collaboration

Jira, Asana and Confluence.

AI

Claude and Codex. Reusable skills, AI loops, websites and an app.

Customers and marketing

Intercom, Fullview, HubSpot, WordPress, Google Analytics and Google Tag Manager.

Web and technology

HTML, CSS, JavaScript, automation and data feeds.

Audio and video

Logic Pro, Pro Tools, Reaper, Adobe Premiere Pro, Final Cut Pro and Photoshop.

Documentation

Product specifications, user stories, guides and support articles. All university assignments written in LaTeX.

Education and training

2010 - 2012

Master's degree (cand.it.) in Digital Design, Aarhus University
Specialisation in Audio Design.

2007 - 2010

BSc in Medialogy, Aalborg University
Interactive media, technology and user experience.

Training

Completed the statutory Danish occupational health and safety training. Web applications with Microsoft .NET and C# (Itucation, 2013).

Languages and interests

Languages
